

Why to choose for Xeikon?

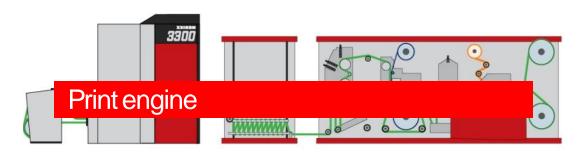

XEIXON
WORKFIOW
VERSION 4.5

- 1. Choice of different digital presses
- 2. Full rotary technology variable repeat
- 3. Consistently high quality
- 4. Application tuned dry toner
- 5. Dedicated workflow

In Mould labels applicatie

ICE toner

Primers

Consumables

ICE- toner

- Reliable process Offset a-like quality
- PET-based resin, high melting point
- Light fast : >6 blue whoole scale
- Food compliant (indirect, direct dry food)
- No odor
- One-pass opaque white
- CMYK, white, custom spot colors, Of-The-Shelf spot colors, Creative colors, ...

folding carton press

Primers

- Water based : DP4453 (Michelman)
 - Corona treatment before coating advised, dyne level must be 40 when coating
- Inline priming module available (WVM)

Equipment

miniUCoat 500

Web Varnish Module

Equipment

WVM (Web varnishing module)

- Inline placed between unwinder and full color printing press
- Able to apply waterbased primers

miniUCoat500

Inline varishing module and rewind

Services

Color Services

COLOR SERVICES

- On-site service providing audit, consulting and implementation on Color management
- Value for the printer :
 - Reduce printing cost
 - Reducing ink/toner consumption
 - Reducing waste
 - · Quality control system
 - Is your operator printing within the expect color standard
 - Color and Quality consistency

Values for different type of printer

printstation used

5 print station excl White

Ability to make color profiles for all the color configurations Toner cost reduction – on average 15%

Toner cost reduction – on average 15%

Quality control tool — ensure that the press is printing with 'gamut'
Reduce/eliminate press time wasted on color matching manipulation
Reduce substrate waste related to color matching

Toner cost reduction
Ability to make color profiles for all color configurations

Full package

Light package

4 print station , CMYK____

Toner cost reduction – on average 15%
